

BUSINESS CAN BE A KICK
IN THE SEAT OF THE
PANTS. LET YOUR WALLET
CUSHION THE BLOW.

International® 4000 Series trucks are built to serve the needs of the owner, driver and maintainer alike. Mostly though, they serve the bottom line of your business.

Owners appreciate the unsurpassed uptime, unmatched reliability, low operating and maintenance costs, and high resale value. You get the industry's premier cab and chassis. A bold and distinctive appearance that projects a positive image of your company.

Legendary International engines with durability-enhancing features that extend engine life, reduce cost of ownership and deliver more horsepower and torque. All backed by comprehensive parts, service and financial support from nearly 1,000 dealer locations across North America.

Drivers are drawn to the inspired lines and outstanding ride, performance and comfort. The ride-engineered chassis system delivers superior handling and control. A tight turning radius ensures outstanding

maneuverability. Easy-to-grasp door handles, wide door openings and well-placed offset steps make for easy three-point entry and egress. And inside the cab, the curved front windshield provides a panoramic view of the road – while abundant room, world-class fit and finish and a best-in-class HVAC system create a comfortable, quiet driver environment.

International earns high marks from service technicians too. Repair times have been reduced up to 20% with extended preventive maintenance service intervals, easy access to major components and faster daily fluid checks. Hood, grille, mirror and headlights are simple to repair or replace. And the International® Diamond Logic™ Electrical System simplifies troubleshooting and reduces diagnostic time for increased vehicle uptime.

For vocations like pickup and delivery, beverage, utility and recovery, International 4000 Series trucks are all business when it comes to improving yours.

POTENTIAL ADDED VALUE BASED ON 200,000 OWNERSHIP MILES (321,869 KM)

FEATURE

ADDED VALUE

1

Breakaway mirrors

\$700-\$1,100

2

Three-piece hood (front corner replacement)

\$1,000

3

HVAC system self-diagnostics

\$250

International Diamond Logic Electrical System

\$500

Increased driver retention and productivity

\$1,000-\$2,000

TOTAL

\$3,450-\$4,850

1 Two-way breakaway mirrors can withstand up to a 9-mph impact, potentially reducing door and mirror repair costs by \$700 – \$1,100 over the life of the vehicle (optional chrome mirrors shown).

2

The three-piece hood is less expensive to repair with a potential savings of up to \$1,000 over the cost to repair a single-piece hood.

3

Best-in-class HVAC system for a comfortable and quiet driver environment. Optional air-conditioning includes a self-protection system offering a potential repair savings up to \$250.

Flip-out vent windows offer added air circulation.

A WORK ENVIRONMENT SO INVITING,
 “WORK” MAY BE TOO STRONG A WORD.

- The swept-back angle and curved design of the windshield and the sloped hood offer a commanding view of the road with outstanding peripheral vision.
- World-class fit and finish and improved insulation ensure an exceptionally quiet driver environment.
- The industry's most spacious cab measures 72.5" (184 cm) wide and 56.8" (144 cm) floor to ceiling with more shoulder room, headroom and belly room to keep drivers of all sizes comfortable. Available 26" (66 cm) extended cab and crew cab.
- The ergonomically designed interior offers high-back seats with integrated headrests, easy-to-read gauges and easy-to-use controls.
- With Intuitive Shift™, automatic transmission shift points are matched with engine power curves to deliver smoother shifts and increased responsiveness, reliability and fuel economy.

- Our best-in-class HVAC system provides ample air-conditioning, heating and defrosting flow. Electronic controls make operation easier.
- The standard overhead console provides ample storage and convenience.
- The International Diamond Logic™ Electrical System brings added brainpower and integration to your application by allowing the engine, transmission, cab and body to talk to each other.

- Advanced diagnostics reduce downtime with self-protected intelligent modules that help drivers and technicians pinpoint electrical problems.
- The fully programmable system allows for automation of tasks. For example, optional power door locks can lock automatically based upon a preprogrammed truck speed.
