PRODUCTIVITY AND PERFORMANCE.

JCB HAS A PROVEN 35-YEAR TRACK RECORD OF DESIGNING AND MANUFACTURING WORLD-BEATING TELESCOPIC HANDLERS FOR THE CONSTRUCTION INDUSTRY. THE NEW COMPACT 525-60 HI VIZ IS THE LATEST IN THIS LONG LINE OF MACHINES BUILT FOR MAXIMUM PRODUCTIVITY ON ANY SITE.

Maximum maneuverability.

1 Our 2-speed transmission allows operators to select high and low speeds. The low speed setting complies with building site speed regulations, while high speed is ideal for roading.

2 Hydrostatic transmission makes it easy for operators to achieve precise machine movements even in cramped spaces. The driveline works in parallel with the braking system too; a transmission dump on the foot brake offers superb multi-functioning and increased power during loading and rehandling.

3 For excellent traction and performance in soft, muddy conditions, we've fitted the 525-60 Hi Viz with 4WD as standard. Opt for our limited slip differential axle to maximize tractive effort on slippery surfaces. This system transfers drive from the spinning wheel to the stationary wheel.
