JOHN DEERE

135 P-TIER EXCAVATOR

SIZABLE SOLUTION FOR REAL-WORLD ACTION

Whether your work is in urban renewal, underground utilities, or street repair, the John Deere 135 P-Tier Excavator is purpose-built to deliver legendary performance. Reduced-tail-swing design, ease of operation, and proven components are just a few of the customer-inspired details that have earned this mid-size muscle a well-deserved reputation in the industry and on jobsites just like yours. Plus a versatile range of production-boosting optional advantages like a durable backfill blade will help you realize all the tasks you can complete in your corner of the work world.

FEATURES

Dial it up

Multi-language LCD monitor and rotary dial provide intuitive access to a wealth of information and functions. Just turn and tap to select work mode, access operating info, check maintenance intervals, source diagnostic codes, adjust cab temperature, and tune the radio. Plus much more.

Close-quarter specialist

Maneuverable reduced-tail-swing model fits in tight or crowded spaces, minimizing the risk of damage to the machine or your surroundings. Optional rubber crawler pad helps cushion impact to concrete or asphalt when working on street repairs or in residential areas.

Put technology to work

John Deere Powerwise Plus™ technology delivers on-demand power. Precise pump flow when pilot controls are metered provides reliable, fuel-efficient machine performance.

Take control

Ergonomically correct short-throw pilot levers enable smooth, predictable fingertip control with less movement or effort. Sliding switch allows proportional speed control, for easy fingertip command of standard auxiliary hydraulics, maximizing machine versatility.

See it like never before

Integrated into the main monitor, optional right rear left camera system with additional LED surround lighting work together to supplement 270-degree visibility of the area around the machine, even in low-light conditions.

**REDUCED-
TAIL-SWING**
MODEL EASILY FITS IN

Comfort in the cab

Spacious and well-appointed cab features standard rearview camera for enhanced awareness. Sculpted mechanical-suspension high-back seat slides together or independent of the joystick console to help keep operators comfortably supported.

Do more with one

Optional backfill blade enhances machine stability and eliminates the need for extra equipment.

Added leverage

When the going gets tough, simply press the standard power-boost button on the right-hand control and muscle through.

DPF no more

Efficient Isuzu engine burns particulate matter in the cylinder during combustion, eliminating ash-service intervals and regenerations, for EPA Final Tier 4/EU Stage IV aftertreatment without the need for a diesel particulate filter (DPF).

You'll be a fan

Highly efficient heavy-duty cooling system keeps things cool, even in tough environments or high altitudes. Cool-on-demand suction-type fan helps reduce material buildup and maintenance.

Uptime optimizers

Vertical spin-on fuel and engine oil filters are positioned for streamlined maintenance. Grouped service points and fluid-level sight gauges ease routine checks. Battery-disconnect switch in the rear door behind the cab helps extend battery life.

OPTIONAL BACKFILL BLADE BOOSTS VERSATILITY

Precision Construction

This suite of construction technology delivers **Productivity Solutions** to help you get more done, more efficiently. In-base JDLink™ connectivity provides machine location, utilization data, and alerts to help you maximize productivity and efficiency. To maximize uptime and lower costs, JDLink also enables **John Deere Connected Support™**. Dealers use Expert Alerts based on data from thousands of connected machines to proactively address conditions that may otherwise likely lead to downtime. Your dealer can also monitor machine health and leverage remote diagnostics and programming capability to further diagnose problems and even update machine software without a time-consuming trip to the jobsite.*

Lift Capacities

135 P-TIER

Boldface type indicates hydraulically limited capacity; lightface type indicates stability-limited capacities, in kg (lb.). All lift capacities are based on ISO 10567 (with power boost). Machine equipped with standard counterweight and situated on firm, level, uniform supporting surface. Total load includes weight of cables, hook, etc. Figures do not exceed 87 percent of hydraulic capacities or 75 percent of weight needed to tip machine.

Buckets 135 P-TIER						
A full line of buckets is offered to meet a wide variety of applications. Digging forces are with power boost. Buckets are equipped with John Deere TK-Series Bucket Teeth standard. Replaceable cutting edges and a variety of teeth are available through John Deere Parts. Optional side cutters add 150 mm (6 in.) to bucket widths. Capacities are SAE heaped ratings.

Bucket Selection Guide*						

* Contact your John Deere dealer for optimum bucket and attachment selections. These recommendations are for general conditions and average use. Does not include optional equipment such as thumbs or couplers. Larger buckets may be possible when using light materials, for flat and level operations, less compacted materials, and volume loading applications such as mass-excavation applications in ideal conditions. Smaller buckets are recommended for adverse conditions such as off-level applications, rocks, and uneven surfaces. Bucket capacity indicated is SAE heaped.
